

DIRECT MAIL INKS

PRODUCT:

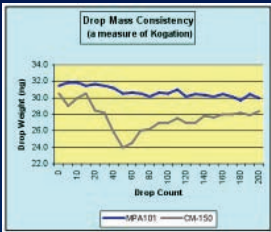

MPA-101 Direct Mail Replacement Ink

TEST:

Comparison of Sensient MPA-101 with Collins CM-150

RESULT:

MPA-101 is still ready to print even after 10 minutes of de-capping

NOTE: The following are results of de-capping from one to ten minutes:

1 minute de-capping

2.5 minute de-capping

5 minute de-capping

10 minute de-capping

COL = Collins CM-150 ◆
O4 = Sensient MPA-101 ◆

SensiJet® Inks for Direct Mail Applications

SensiJet® inks for Direct Mail applications will provide crisp, clean and reliable imaging regardless of which inkjet addressing system your customers are running. SensiJet inks deliver performance above and beyond OEM inks.

Sensient offers high quality inks for both piezo-based printheads and thermal inkjet (TIJ) printheads:

- SensiJet PZ Series inks, specifically formulated for Spectra Galaxy 256 printheads, along with SE-128 Piezo bulk ink fed printers
- SensiJet MPA Series inks, specifically formulated for the TIJ-based printers using HP 45A cartridges

SensiJet inks deliver excellent jet sustainability in high speed production environments. SensiJet Direct Mail inks provide a dense, consistent print, ensuring excellent barcode readability.

SensiJet inks are manufactured in a tightly controlled production environment, assuring consistency of every cartridge and container. These inks are available in a variety of packaging configurations including 42 ml cartridges, 500 ml bags, 1 Liter bottles, 1 Gallon and 5 Gallon pails. Other sizes available upon request.

SensiJet inks are manufactured in a state-of-the-art production facility, ensuring every container and every cartridge performs to the highest standards. With Sensient's lean manufacturing process, you will enjoy every competitive pricing. SensiJet inks are also available in private label packaging to give your company greater marketing capability.

Call Sensient today and ask how SensiJet inks make perfect sense for you.
