- Flexible / Custom Packaging And Color Capabilities

Sensient has enjoyed a long history of inkjet development and is proud to offer to its partners SensiJet® inks for Primary Package marking and Secondary Case coding. The SensiJet brand of coding and marking inks will help you make your mark with high quality, precision crafted inks. Our dedicated technical team has developed a range of inks to satisfy all of our partners' existing needs and we are positioned to offer new product development as well. Our mission is to work with our partners to identify needs that have not been met and, through our technical expertise and commercial experience, provide solutions for the market.

SensiJet offers:

- Direct-fit OEM replacement packaging or in bulk supply
- Fully compatible, pour-over capable inks
- High optical density formulations with precise dry times

SensiJet delivers:

- High Resolution Inks for all OEM / Engine manufacturers
- Large Character (DOD) Inks for porous and non-porous substrates
- Continuous (CIJ) Inks for primary package marking
- Thermal (TIJ) Inks for cartridge-based Secondary coding systems

Sensient inks are designed to help you make your mark, and make your mark with crisp clean print that does not bleed or feather. What you can expect from SensiJet Inks are barcodes that scan accurately due to high image contrast over a wide variety of corrugate grades. What you can expect is consistency in product that will keep production running and no increase in service requirements.

Talk to Sensient about what we can do for you to make sure you make your mark. Do not settle for anything less than SensiJet brand inkjet inks.
